

Broadband Box Fiber Distribution

Overview

This optical fiber distribution box integrates essential functions—splicing, splitting, storage, distribution, and routing—into one wall-mountable unit. Its modular, user-friendly design simplifies network expansion while delivering superior durability and long-term reliability. It acts as a central point for terminating, splicing, and distributing these cables. Expected to ship 18 Aug, 2026 4-6 Weeks available. The distribution box is sealed adopts buckle + two screw type structural seals, and the left and right turnover. In broadband optical fiber access network, we often see the all kinds of fiber box such as fiber cabinet, fiber optic distribution box, fiber optic terminal box, multimedia box, and customer box. What is the difference between these fiber boxes.
