

Explosion-proof distribution box is not rainproof

Overview

If used outdoors, a rain cover should be fitted to prevent water ingress and rust. Install the box in a location with a lower risk of danger, away from collision risks, heat sources, and as much as possible, in a corrosion and moisture-resistant area to extend its service. To the casual observer, it may seem like nothing more than a “rainproof box. ” Yet to professionals in the field, NEMA 3R signifies a deliberate balance of durable protection and cost-efficiency. Misjudging its capabilities can result in costly equipment failures, while overengineering to a higher. (1) Waterproof distribution box engineered for harsh outdoor and industrial environments, providing IP65–IP68 sealing against dust, rain, and UV. Built with durable materials, CE & ROHS certified. Contact us for custom solutions! Explosion-proof distribution boxes are mainly used in coal mines, fire stations, petroleum, petrochemical installations and textile and other flammable and explosive places. These sturdy solutions are certified according to global standards such as ATEX, IECEx.
