

India Coherent Optical Module SFP

AI Overview

Coherent SFP optical modules are available in India through multiple suppliers, supporting high-speed data transmission for data centers, metro, and long-haul networks.

Overview of Coherent Optical Modules

Coherent optical modules are advanced transceivers that use coherent detection technology to enable high-speed, long-distance data transmission over fiber networks. They are widely used in data center interconnects (DCI), metropolitan area networks (MAN), and long-haul telecom networks. Coherent SFP modules can support data rates from 100G up to 400G, with some OSFP and QSFP variants reaching 800G for high-capacity Ethernet and DWDM applications. These modules are energy-efficient, compact, and designed for low-latency, high-bandwidth networking.

Market Trends in India and Asia Pacific

The global coherent optical module market is projected to grow significantly, with the Asia Pacific region, including India, expected to exhibit the fastest growth due to expanding data centers and telecom infrastructure. The 400G OSFP coherent modules are particularly in demand, driven by the need for enhanced bandwidth and 400G network deployments. Leading global manufacturers include NeoPhotonics, Acacia, II-VI Incorporated, InnoLight, Accelink, Source Photonics, and Gigalight.

Suppliers and Manufacturers in India

Several Indian suppliers provide SFP and coherent optical modules, offering competitive pricing and bulk order options:
