

Optical Module PX20

Overview

The JFOPT EPON OLT PX20+++ 7dBm Transceiver is a high-performance 1. 25G SFP module designed for Optical Line Terminal (OLT) applications, supporting 1490nm downstream transmission and 1310nm upstream reception over single-mode fiber (SMF) with a 20km reach. Our main product lines include ONU/ONTs, OLTs, wireless routers, CPE, and other access products to meet the needs of various telecom operators, and we are committed to delivering ultra-fast network experiences to broadband users worldwide. Data lines are internally AC coupled. 25G optical links over single-mode fiber terminated with SC/UPC simplex connectors and can be used in commercial temperature environment for interoperability with 1000BASE-BX interfaces. EPON OLT SFP PX20++: This small. EPON OLT PX20+++ is an SFP packaged hot-swappable optical module (compliant with IEEE 802. It adopts a single-fiber bidirectional design, and the uplink and downlink rates can reach up to 1. 25Gbps, which is widely compatible with. AscentOptics' ETP-NS11-20CP0 sets a new standard for symmetric 1. With reset-less burst-mode reception, it simplifies system design.
