

Outdoor Fiber Optic Cable Splicing Quotation

Overview

Browse verified fiber optic and cable splicing contractors across the country. Filter by service type and location. For most commercial projects, expect to pay \$50-\$150 per fusion splice point - but that number can swing in either direction based on the factors below. The term cost and price appear to frame the budgeting discussion early in. Fiber optic cables consist of multiple fibers, each designed for high-speed data transmission. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. With prices ranging from \$1 to over \$ 50 per linear foot, depending on the installation method. Adtell Integration is capable of supporting your fusion splicing requirements whether they require Singlemode, Multimode, or Ribbon Splicing.
