

PZ type distribution box model

Overview

The PZ30 series distribution box is a widely used modular electrical enclosure designed for organizing and protecting low-voltage circuit breakers (MCBs), RCDs, and other control components in residential, commercial, and light industrial applications. The series products are made of standard cold-rolled steel and use powder-coating techniques to process the crust. Available in both surface and flush mount versions, these boxes feature a transparent cover, durable ABS construction, and multiple size options (2–36. PZ30 series terminal combined type distribution box adopts the form of steel plastic structure, box base adopts steel structure and plated, end cover is made of flame retardant engineering plastic injection molding and equipped with transparent polycarbonate protective cover. Type meaning: PZ 30. PZ30 flush mount distribution box is a standard indoor concealed wiring enclosure, specially designed to install miniature circuit breakers, leakage protectors and modular electrical components. It applies to AC 50/60Hz, rated voltage 230V/400V terminal power circuits. The box is equipped with a frame-type guide rail, which is convenient for disassembly and connection.
