

Pdu intelligent power distribution system

Overview

The EL2P PDU provides reliable, intelligent power distribution in hospitals and clinics, reducing install complexity and enhancing uptime for medical networks and digital records systems. Designed to simplify deployment and take stress out of power distribution, this intelligent PDU helps reclaim valuable hours. Reduce IP addresses by Daisy Chaining up to 64 PDU's. iPDUs serve as a centralized power management solution that enhances the efficiency, reliability, and monitoring capabilities of power. Smart PDUs (power distribution units) provide monitored and controllable power distribution within rack-based infrastructure environments. The EL2P PDU is the smarter, simpler way to manage rack-level power.
