

RoHS Access Switch SFP

AI Overview

RoHS-compliant access switches with SFP ports provide flexible, environmentally safe connectivity for enterprise and SMB networks.

Overview

RoHS (Restriction of Hazardous Substances) compliance ensures that switches are manufactured without harmful materials, making them safe for both users and the environment. Access switches with SFP (Small Form-factor Pluggable) ports allow for modular fiber or copper connections, supporting flexible network expansion and high-speed uplinks.

Key Models and Features

- H3C S1600V2 Series: Web-managed gigabit access switches supporting both Ethernet and optical ports. Features include line-speed forwarding, broadcast storm suppression, black hole MAC filtering, and intelligent web management. The series implements energy-saving designs and fully meets EU RoHS standards, making it suitable for SMBs, campuses, CCTV, and commercial chains .
- Celestica ES1000: Enterprise-class 1U access switch with 24 or 48x 1GbE ports and 4x 25GbE SFP28 ports. Offers high reliability with redundant fans, hot-swappable power supplies, and optional PoE++ support. Designed for enterprise edge, campus, retail, and IoT applications .
- Ruijie RG-CS83-48GT4XS-P: 48-port 1GE Layer 3 managed access switch with modular OS, Python support, and advanced surge protection. Supports fanless operation and flexible mounting options. RoHS compliance ensures environmental safety while providing robust protection for harsh environments .
