

Router Fiber Optic Management

Overview

A fiber management system (FMS) manages optical fiber connections from outside of fiber rack to the fiber routers. Fiber-optic cable duct containing many fibers comes from far end sites and terminates on the FMS using splicing technology. Ocius-X is an AI-based solution that simplifies the management of fiber networks. Designed for both strategic planning and day-to-day execution, Ocius-X supports efficient. Fiber optic networks are the foundation of current telecommunications, permitting rapid data transmission over huge distances. Fiber network. Seamlessly design, plan, manage and analyze network data to maximize your fiber optic network's performance.
