

Spanish Explosion-Proof Lighting and Power Distribution Box

Overview

Introducing our Explosion-proof Lighting (Power/Repair) Distribution Box, designed for enhanced safety and efficiency in hazardous environments. An explosion-proof distribution box is a complete distribution unit designed to house switches, instruments and other equipment in a centralised manner, preventing explosions at the installation site caused by sparks, arcs or high temperatures. They vary in terms of materials, including metal and flame-retardant plastic; installation methods, such as vertical, hanging, concealed, or exposed installations; and voltage levels, including 380V and 220V. They can be equipped with 'Ex d', 'Ex e' and 'Ex tb' IP66 command and control operators. We specialise in the development and manufacturing of long-lasting luminaires with high protection ratings for extreme conditions in hazardous areas in oil &. Atexdelvalle offers world-class explosion-protected solutions guaranteeing highest quality and performance with no compromise.
